Purpose

This document is designed to assist with how to make and cancel meeting room or resource bookings through Outlook after the Microsoft Office 365 (Office 365) Migration.

Document Support Boundaries

This Document is written to support the following mail clients

- Outlook 2010 (Windows)

**Note:** For any other versions of Email clients, please consult your manual, built in help system, place of purchase or use online searches for configuration instructions.
Meeting Rooms—what has changed?

All meeting rooms are progressively being converted to a new format.

All current meeting room mailboxes are being converted to Resource Mailboxes with Calendars. This will occur when your section migrates to Office 365.

As a result, how you access and request a booking for a meeting room will slightly change.

How to get access to make a booking?

If you indicated that you made meeting room bookings prior to Office 365 migration, you will retain that access.

Otherwise lodge an IT Service Desk job requesting access to be able to book the specific meeting room.

Special note about making bookings in Office 365

- You need to include the meeting room itself in the list of recipients for the meeting.
- This also applies to shared resources (a work vehicle).
